

BIODYNAMICS

A 2 DAY INTRODUCTORY WORKSHOP

PRESENTED BY HAMISH MACKAY WITH CHARLIE ARNOTT

RAHAMIM
ECOLOGY
CENTRE

BATHURST, NSW 22-23 AUGUST

Biodynamics is a cost effective method of producing high quality plants, food and fibre with regenerative ecological outcomes.

Proven for nearly a century all over the world, biodynamic methods promote the creation of organic matter, enriching and deepening topsoil and significantly improving its ability to retain water and achieve fertility and balance.

An Introduction to Biodynamics brings together the art and science of agriculture, teaching participants how biodynamic preparations contribute to the soil food web and introduce practical aspects needed to apply biodynamics:

- The life of the soil
- Creating fertility in your soil
- Managing your natural resources
- Practical use of the biodynamic preparations
- Developing risk management: Weeds, Pests, Diseases
- Meeting climate change challenges: Drought, Flood, Carbon sequestration

HOW MUCH DOES IT COST?

Hamish and Charlie together will lead you through the two day interactive, hands on program. Course cost includes, catering (2 x lunch, 2 x morning tea, 2 x afternoon tea), subscription to the quarterly Biodynamics 2024 webinar, access to the closed Biodynamics Alumni Facebook group.

Early bird ticket: \$550 pp

Book and pay in full by 28/07/2019

Multiple participants \$440 pp

From one family or business

Intro to Biodynamics Graduate repeat: \$160

Single person \$660 pp From 29/07/2019

LOCATION: Rahamim Ecology Centre,
34 Busby St, South Bathurst NSW 2795

Applicable to home gardeners, horticulture, small intensive cropping systems, broad acre farming and animal production, if you would you like to learn how biodynamic practice is different from organic gardening and permaculture methods then this course is for you.

** This workshop will provide you with the foundation to attend a follow on Biodynamics Preparation Making Workshop. At the Biodynamic Preparation Making Workshops held each Spring and Autumn you will learn how to make season specific biodynamic preparations.

HAMISH MACKAY

Hamish has been working with biodynamics for 45 years and presents biodynamics in a practical and relatable format. Each workshop is a unique collaborative and interactive learning experience guided by participants interests and curiosities.

CHARLIE ARNOTT

Charlie is an award winning grazier and educator who started his Regenerative Farming journey 15 years ago. Charlie is a proud advocate of Regenerative Ag and Biodynamics. His 5000 acre property is run using Biodynamic methods.

ABOUT RAHAMIM ECOLOGY CENTRE

Rahamim Ecology Centre is an environmental education, spirituality and advocacy ministry of the Sisters of Mercy providing innovative educational programs and opportunities that promote a new understanding of the universe, science and theology.
